MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis ("MD&A") of Big Ridge Gold Corp. ("Big Ridge" or "the Company") provides information relevant to an assessment and understanding of the financial condition and results of operations of the Company. This MD&A should be read in conjunction with the Company's condensed interim consolidated financial statements for the three and nine months ended March 31, 2022 and 2021 and the notes thereto, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board, including International Accounting Standard 34 – Interim Financial Reporting.

This MD&A includes information available to and is dated May 24, 2022. Unless otherwise stated, all currency amounts are stated in Canadian dollars, and all financial information provided in this MD&A is prepared in accordance with IFRS.

FORWARD LOOKING INFORMATION

Certain information contained in this MD&A constitutes forward-looking information within the meaning of Canadian securities laws ("forward-looking statements"). All statements in this MD&A, other than statements of historical fact, which address events, results, outcomes or developments that Big Ridge expects to occur are forward-looking statements.

Forward-looking statements relate to future events or future performance and reflect management's expectations or beliefs regarding future events and include, but are not limited to, statements with respect to the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the timing and amount of estimated future production, costs of production, capital expenditures, success of mining operations, environmental risks, permitting risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved" or the negative of these terms or comparable terminology. By their very nature forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; future prices of resources; possible variations in ore reserves, grade or recovery rates; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities; as well as those factors detailed from time to time in the Company's interim and annual financial statements which are filed and available for review on SEDAR at www.sedar.com. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

Other than as specifically required by law, Big Ridge undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made, or to reflect the occurrence of unanticipated events, whether as a result of new information, future events or results otherwise.

In March 2020 the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally,

potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or results of operations at this time.

QUALIFIED PERSONS AND CAUTIONARY NOTE REGARDING MINERAL RESOURCES

The disclosure in this MD&A of information of a scientific or technical nature for the Company's Hope Brook Gold Project, including disclosure of mineral resources, is based on the HBGP Technical Report (as hereinafter defined) prepared in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("**NI 43-101**"), as summarized under "Hope Brook Gold Project" in this MD&A, and other information that has been prepared by or under the supervision of "qualified persons" (as such term is defined in NI 43-101) with the consent of such persons. The HBGP Technical Report has been filed on SEDAR and can be reviewed at www.sedar.com. Actual recoveries of mineral products may differ from reported mineral reserves and resources due to inherent uncertainties in acceptable estimating techniques. In particular, "indicated" and "inferred" mineral resources have a greater amount of uncertainty as to their existence, economic and legal feasibility. It cannot be assumed that all or any part of an "indicated" or "inferred" mineral resource will ever be upgraded to a higher category of resource or, ultimately, a reserve. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Investors are cautioned not to assume that all or any part of a mineral deposit with resources in these categories will ever be converted into proven or probable reserves.

Except where specifically indicated otherwise, the scientific and technical information contained in this MD&A was reviewed and approved by William McGuinty, P.Geol., Vice President Exploration for the Company, a Qualified Person in accordance with NI 43-101.

CAUTIONARY NOTE TO U.S. INVESTORS

This MD&A has been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ materially from the requirements of United States securities laws applicable to U.S. companies. For U.S. reporting purposes, the United States Securities and Exchange Commission (the "SEC") has adopted amendments to its disclosure rules (the "SEC Modernization Rules") to modernize the mineral property disclosure requirements for issuers, referred to as "mining registrants", whose securities are registered with the SEC. These amendments became effective in February 2019 with compliance required for the first fiscal year beginning on or after January 1, 2021. While not applicable to Big Ridge, the SEC Modernization Rules replace the historical property disclosure requirements for mining registrants that were included in SEC Industry Guide 7, which will be rescinded from and after the required compliance date of the SEC Modernization Rules. Information concerning our mineral properties has been prepared in accordance with the requirements of Canadian securities laws, which differ in material respects from the requirements of the SEC set forth in Industry Guide 7. In accordance with NI 43-101, the terms "mineral reserve", "proven mineral reserve", "probable mineral reserve", "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" are defined in accordance with CIM standards. While the terms "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" are recognized and required by NI 43-101, and now recognized under the SEC Modernization Rules, SEC Industry Guide 7 does not recognize them. Readers of this MD&A are cautioned that mineral resources do not have demonstrated economic viability. Inferred mineral resources have a high degree of uncertainty as to their existence and as to whether they can be economically or legally mined. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Therefore, readers are cautioned not to assume that all or any part of an inferred mineral resource exists, that it can be economically or legally mined, or that it will ever be upgraded to a higher category. Likewise, readers are cautioned not to assume that all or any part of measured mineral resources or indicated mineral resources will ever be upgraded into mineral reserves.

OVERVIEW OF BIG RIDGE

Big Ridge is focused on the acquisition, exploration and development of precious metals properties located in Canada. The Company was incorporated under the provisions of the Business Corporations

Act (British Columbia) on June 6, 1987. The Company is listed on the TSX Venture Exchange as a Tier 2 mining issuer under the trading symbol BRAU and is a reporting issuer in the provinces of British Columbia and Alberta.

The Company is currently advancing the Hope Brook Gold Project under the terms of an option agreement with First Mining Gold Corp., discussed below, pursuant to which it may earn an interest of up to 80%. Big Ridge considers the Hope Brook Gold Project its only material resource property interest.

In addition, the Company owns 100% interests in the following resource properties:

- The Destiny Gold Property in Quebec. During the period ended March 31, 2022, the Destiny property was the subject of an option agreement with Clarity Gold Corp., pursuant to which Clarity had the right but no obligation to earn an interest of up to 100% in the property. As described further in this MD&A, Clarity defaulted on its payment obligations in January 2022, thereby terminating the option agreement without affecting the Company's ownership interest in the project.
- The Oxford Gold Property in Manitoba. Big Ridge has entered into an Exploration Agreement with the Bunibonibee Cree Nation ("BCN"), which will enable the Company to recommence exploration activity at Oxford once a Heritage Resource Impact Assessment can be completed. As reported below, the completion of this study has been delayed as a result of public health protection measures undertaken by the BCN as a response to COVID-19.

OPERATIONAL HIGHLIGHTS

During the period ended March 31, 2022, the Company continued work on its inaugural drilling program at the Hope Brook Gold Project, expected to total 25,000 metres of drilling.

During the period ended March 31, 2022, the Company completed a number of milestones, including:

- Continued drilling at Hope Brook, totaling 10,738 m of the 25,000-meter planned program, the first substantive ground exploration activity undertaken at Hope Brook since 2012. 45 diamond core drill holes were completed by the end of March 2022.
- Refurbishment of existing equipment and additional staff accommodations made necessary by the Company's COVID-19 health and safety protocols.
- Receipt of report for a 28.5 km Controlled Source Audio-frequency Magnetotellurics (CSAMT) geophysical survey designed to test the Main and 240 Zones and a large 1,200-meter strike exploration area between these two main zones. Extensions to the southwest and northeast of the 240 and Main zones were also surveyed. This survey's results are expected to better define and deepen signatures of current targets identified in previous geophysical surveys within and adjacent to the area in the former Hope Brook Mine.
- Compilation and reprocessing of key geophysical surveys conducted on the property was initiated, using a third-party consultant to improve identification of conductive and resistive zones related to mineralization at Hope Brook, with completion expected before the end of the fiscal year.
- Continuation of a property-wide (26,000 ha) compilation and processing of the historic database of all available geochemical (assay) samples collected by historic explorers at Hope Brook. The results of this work, which is expected to be completed before the end of the fiscal year, will be used to target Hope Brook and other deposit styles within the Property licenses and assess additional gold potential.

FINANCINGS

Flow-Through Unit Financing and Acceleration of Warrants:

On June 30, 2021, Big Ridge closed a brokered private placement of 24,390,500 flow-through units at a price of \$0.205, with each unit consisting of one flow-through share and one warrant exercisable at a price of \$0.18 per share and expiring on June 30, 2023, for gross proceeds of \$5,000,053.

The trading price of Big Ridge's shares in the period from June 8 to June 21, 2021, following the announcement of this financing, enabled Big Ridge to trigger the early expiry of 22,325,000 warrants issued in connection with its May 2020 private placement. From June 22 to June 30, 2021, warrant holders exercised a total of 6,250,000 warrants for aggregate proceeds of \$1,250,000, and the remaining 16,075,000 warrants were exercised in the period ended March 31, 2022 for additional proceeds of \$3,215,000.

MINERAL PROPERTY INTERESTS

Hope Brook Gold Project:

On April 6, 2021, Big Ridge entered into an earn-in agreement with First Mining Gold Corp. ("First Mining"), pursuant to which the Company may earn an interest of up to 80% in the Hope Brook Gold Project, a past producing mine located in Newfoundland and Labrador. This transaction closed on June 8, 2021.

On closing, Big Ridge paid First Mining \$500,000 in cash and issued 11,500,000 common shares of Big Ridge, at which point Big Ridge became the operator of the project.

The earn-in is comprised of two stages, as described below:

- In order to exercise its first earn-in right to acquire a 51% interest in the Hope Brook Gold Project, Big Ridge must incur and fund expenditures on the Hope Brook Gold Project of no less than \$10 million by June 8, 2024. Upon achieving this expenditure threshold and issuing an additional 15 million common shares to First Mining, subject to the approval of the TSX Venture Exchange, Big Ridge (51% interest) will become party to a joint venture agreement for the Hope Brook Gold Project with First Mining (49% interest), with Big Ridge continuing as the operator. Concurrently with the creation of the joint venture, the joint venture entity will grant to First Mining a 1.5% net smelter returns royalty on the Hope Brook Gold Project, subject to a right of Big Ridge to buy back 0.5% for \$2 million.
- To earn an additional 29% interest in the Hope Brook Gold Project, Big Ridge must incur an additional \$10 million in expenditures on the project by June 8, 2026. Upon achieving this final expenditure threshold and issuing an additional 10,000,000 common shares ("Stage 2 Shares") to First Mining, subject to the approval of the TSX Venture Exchange, Big Ridge will become the holder of an 80% interest in the Hope Brook Gold Project. Big Ridge will solely fund all expenditures on the project up to and including the date on which Big Ridge announces the results of a feasibility study on the project, at which time First Mining's free carry period will terminate. If the issuance of the Stage 2 Shares would result in First Mining owning more than 19.9% of the total number of Big Ridge common shares issued and outstanding following such share issuance, the number of Stage 2 Shares shall be reduced such that First Mining will own no more than 19.9% of the total number of Big Ridge common shares issued and outstanding following the issuance of the Stage 2 Shares.

In addition, upon the commencement of commercial production at the project, Big Ridge will pay \$2 million to First Mining.

The Hope Brook Gold Project consists of 6 mineral exploration licences covering a total of 25,075 hectares and hosts an underground gold resource, which is set out below. This resource was based on a cut-off grade of 3 g/t and a long-term gold price of US \$1,200/oz. The resource table below and

the related notes are excerpted from the NI 43-101 compliant technical report entitled “NI 43-101 Technical Report for the Hope Brook Gold Project, Newfoundland and Labrador, Canada”, issued May 6, 2021, with an effective date of April 6, 2021.

Category	Tonnes	Grade (g/t)	Contained ounces gold
Indicated	5,500,000	4.77	844,000
Inferred	836,000	4.11	110,000

Notes:

1. Includes only Mine Zone and 240 Zone areas
2. The above mineral resource estimate is based on a partial percentage block model with dike material removed. Dike percent is estimated at 18% for the Mine Zone and 0 % for the 240 Zone
3. Gold grades reflect application of domain-specific raw assay capping factors that range between 55 g/t Au and 3 g/t Au
4. Rounding of tonnes may result in apparent differences between tonnes, grade and contained ounces
5. Mineral resources that are not mineral reserves do not have demonstrated economic viability. The estimate of mineral resources may be materially affected by environmental permitting, legal, title, taxation, sociopolitical, metal pricing, marketing, or other relevant issues
6. The gold cut-off value of 3.00 g/t reflects reasonable prospects for eventual economic extraction based on application of conventional underground mining methods such as long hole stoping, historical gold recovery levels that range between 80% and 91% for past production (86% for Coastal Gold testing) and a long-term gold price of US\$1200 per ounce

Destiny Gold Project:

On November 27, 2020, the Company entered into an option agreement with Clarity Gold Corp. (“Clarity”) pursuant to which Clarity had the right to earn up to a 100% interest in the Company’s wholly-owned Destiny gold project.

Initially, Clarity had the right to earn a 49% interest in the project by making a series of cash and share-based payments to the Company as described below.

- A deposit of \$50,000;
- A cash payment of \$450,000 and the equivalent of \$1,000,000 in common shares of Clarity on or before January 26, 2021;
- A cash payment of \$750,000 and the equivalent of \$1,000,000 in common shares of Clarity on or before January 11, 2022; and
- A cash payment of \$750,000 and the equivalent of \$1,500,000 in common shares of Clarity on or before January 11, 2023.

Clarity also had the right to increase its interest in the Destiny project to 100% by making an additional \$1,000,000 in cash payments and issuing the equivalent of \$2,000,000 in common shares on or before January 11, 2024. In the event that Clarity earned a 100% interest in the project, the Company would retain a 1% net smelter returns royalty which Clarity had the right to buy back for a further payment of \$1,000,000.

In January 2022 Clarity defaulted on the payments of cash and shares due January 11, 2022 and provided a notice of cancellation to the Company, terminating the option agreement. As a result of the termination of the Destiny Option Agreement, the Company’s 100% interest in the Destiny property remains unaffected, and Clarity is required to return the project in good standing with all assessment work filed for a period of 12 months and to provide the Company with all exploration data from Clarity’s 10,800-meter exploration program completed in 2021. At the date of this MD&A Clarity had not completed an assessment report on the Destiny project as a result of continuing delays in obtaining assay results from its drilling program.

Ontario properties:

On March 11, 2021, Big Ridge entered into a sale agreement with Caprock Mining Corp. (then known as Blingold Corp.) (“Caprock”) pursuant to which Big Ridge agreed to sell its interest in its Mud Lake, Golden Heart, Brookbank East, Three Towers, Miner Lake, and Green Oaks properties to Caprock in exchange for the issuance by Caprock of 10,000,000 common shares of Caprock. The closing of the sale of these properties was subject to, among other things, the listing of Caprock’s common shares on the Canadian Stock Exchange (“CSE”).

Caprock’s shares commenced trading on the CSE on January 26, 2022, and the sale agreement closed on February 28, 2022. The shares received as consideration were valued at their estimated fair value of \$1,000,000, and the Company recognized a gain on the disposal of these properties amounting to \$496,459.

The issuance by Caprock of the shares contemplated by this agreement resulted in Big Ridge holding an initial interest amounting to 24.8% of the issued and outstanding shares of Caprock. Management expects that its interest will be diluted as Caprock pursues additional financing.

Oxford Gold Project:

On October 5, 2020, the Company entered into an Exploration Agreement with the BCN at the Company’s Oxford Gold Project in Manitoba. The first phase of this work, which commenced in the first quarter of the current fiscal year but is suspended at the date of this MD&A, is subject to a Heritage Resource Impact Assessment (“HRIA”). Results of the HRIA will be utilized to outline the upcoming exploration program, previously approved by the Manitoba Government.

The HRIA, which is a prerequisite to the recommencement of ground exploration and drilling at the Company’s 100%-owned Oxford Gold Project, has not proceeded as expected, as a result of the inability of the consultants carrying out this study to visit the property or to meet in person with elders and other members of the BCN. This reflects the significant health challenges faced by the BCN in the Oxford House area of Manitoba.

In conjunction with other mining companies active in the Oxford House area, the Company has extended offers of financial assistance to the BCN. In October 2021, the BCN agreed to permit the Company’s consultants to visit the property, but management is unable to provide guidance at the date of the MD&A on the timing of resumption of the HRIA.

SUMMARY OF FINANCIAL RESULTS

The Company’s consolidated results of operations for the three and nine months ended March 31, 2022 and 2021 are set out below.

	Three months ended		Nine months ended	
	March 31		March 31	
	2022	2021	2022	2021
	\$	\$	\$	\$
EXPENSES				
Exploration expense	3,346,538	6,806	6,641,064	18,742
General and administrative expense	318,508	190,532	1,253,398	695,472
Finance expense (income), net	42,654	(50,200)	396,044	(36,229)
Other income	(496,459)	(690,900)	(496,459)	(690,900)
Loss (Income) and Comprehensive				
Loss (Income)	3,211,241	(543,762)	7,794,047	(12,915)

Three months ended March 31, 2022:

- **Exploration expenses** increased from \$6,806 to \$3,346,538, reflecting the continuation of the Company’s inaugural drilling program at Hope Brook. The expense for the quarter includes costs associated with the 40 holes completed in the quarter and camp costs, including costs of the Company’s labour force.

- **General and administrative expenses** increased from \$190,532 to \$318,508. The significant cost components which gave rise to this increase are set out below:
 - **Share based compensation expense** increased from \$28,008 to \$72,752. Stock option expense in the quarter amounted to \$68,579 (2021 - \$28,008), while expenses associated with deferred share units awarded to the Company's directors and officers amounted to \$4,173 (2021 - \$Nil).
 - **Management fees and Payroll and payroll related costs** charged to operations increased from \$70,000 to \$123,380, due to increases in compensation costs related to the Company's senior management and the Company paying director fees with effect from the fourth quarter of the 2021 fiscal year.
 - **Investor relations** increased from \$20,000 to \$29,167 as the Company incurred additional costs with respect to market maker services and promotional activities intended to improve investor awareness.
- **Finance income/expense, net** decreased from an income of \$50,200 to a net expense of \$42,654 as a result of \$48,128 in mark-to-market losses on the Company's marketable securities in the quarter, compared to \$47,611 in gains in the comparative period.
- **Other income** decreased from \$690,900 to \$496,459, driven by the sale of the Company's Ontario based properties in the current period. The income recognized in 2021 relates to the optioning of the Destiny property, and the two periods are consequently not directly comparable to one another.

Nine months ended March 31, 2022:

- **Exploration expenses** increased from \$18,742 to \$6,641,064, reflecting the commencement of drilling at Hope Brook. The expense for the nine months ended March 31, 2022 includes costs associated with the 56 holes completed from the start of the drilling program to March 31, 2022; the costs of mobilizing the Company's drilling contractor to site and a chartered cargo plane to the Company's temporary base of operations in Stephenville, NL; a geophysical survey completed in October 2021; and camp costs, including costs of the Company's labour force.
- **General and administrative expenses** increased from \$695,472 to \$1,253,398. The significant cost components which gave rise to this increase are set out below:
 - **Share based compensation expense** increased from \$193,489 to \$481,779. Stock option expense in the current period amounted to \$159,262 (2021 - \$193,489) and resulted primarily from fewer options being issued in the period compared to 2021. Expenses associated with deferred share units awarded to the Company's directors and officers amounted to \$322,517 (2021 - \$Nil), the majority of which relates to DSU's issued on June 30, 2021.
 - **Management fees and Payroll and payroll related costs** charged to operations increased from \$242,165 to \$389,340, due to increases in compensation costs related to the Company's senior management and the Company paying director fees with effect from the fourth quarter of 2021.
 - **Investor relations** increased from \$45,475 to \$116,064 as the Company incurred additional costs with respect to market maker services and promotional activities intended to improve investor awareness.
- **Finance income/expense, net** decreased from an income of \$36,229 to a net expense of \$396,044 as a result of mark-to-market losses on the Company's marketable securities in the period ended March 31, 2022.
- **Other income** decreased from \$690,900 to \$496,459, driven by the sale of the Company's Ontario based properties in the current period. The income recognized in 2021 relates to the optioning of the Destiny property, and the two periods are consequently not directly comparable to one another.

SELECTED ANNUAL INFORMATION

The following table summarizes selected financial data for the Company for each of the three most recently completed financial years. The information set out below should be read in conjunction with the Company's audited annual financial statements.

	Years ended June 30		
	2021	2020	2019
	\$	\$	\$
EXPENSES			
Exploration expense	40,850	118,391	292,723
General and administrative expense	1,057,125	508,440	351,904
Finance expense, net	506,409	23,451	68,888
Other (income) expense	(690,900)	-	(149,000)
Loss for the year	913,484	650,282	564,515
Loss per share	0.02	0.06	0.05
Total assets	12,954,153	4,807,328	3,276,418

SUMMARY OF QUARTERLY RESULTS

The table below presents selected financial data for the Company's eight most recently completed quarters:

	March 31 2022	December 30 2021	September 30 2021	June 30 2021	March 31 2021	December 31 2020	September 30 2020	June 30 2020
<i>In thousands of Canadian dollars, except for (income) loss per share</i>								
Financial results								
Loss for the period	3,211	3,183	1,400	926	(544)	195	335	62
Basic and diluted (income) loss per share	0.03	0.03	0.01	0.02	(0.01)	-	0.01	0.01
Exploration and evaluation expenditures	3,347	2,642	653	22	7	5	7	-
Balance sheet data								
Cash and short term deposits	4,513	7,041	10,510	8,295	3,057	2,703	3,037	140
Exploration and evaluation assets	3,568	4,071	4,071	4,071	1,347	2,156	2,156	2,156
Total assets	10,327	12,423	15,227	12,954	5,487	4,894	5,247	4,807
Shareholders' equity	1,579	11,863	14,631	12,769	5,396	4,825	4,996	4,728

LIQUIDITY AND CAPITAL RESOURCES

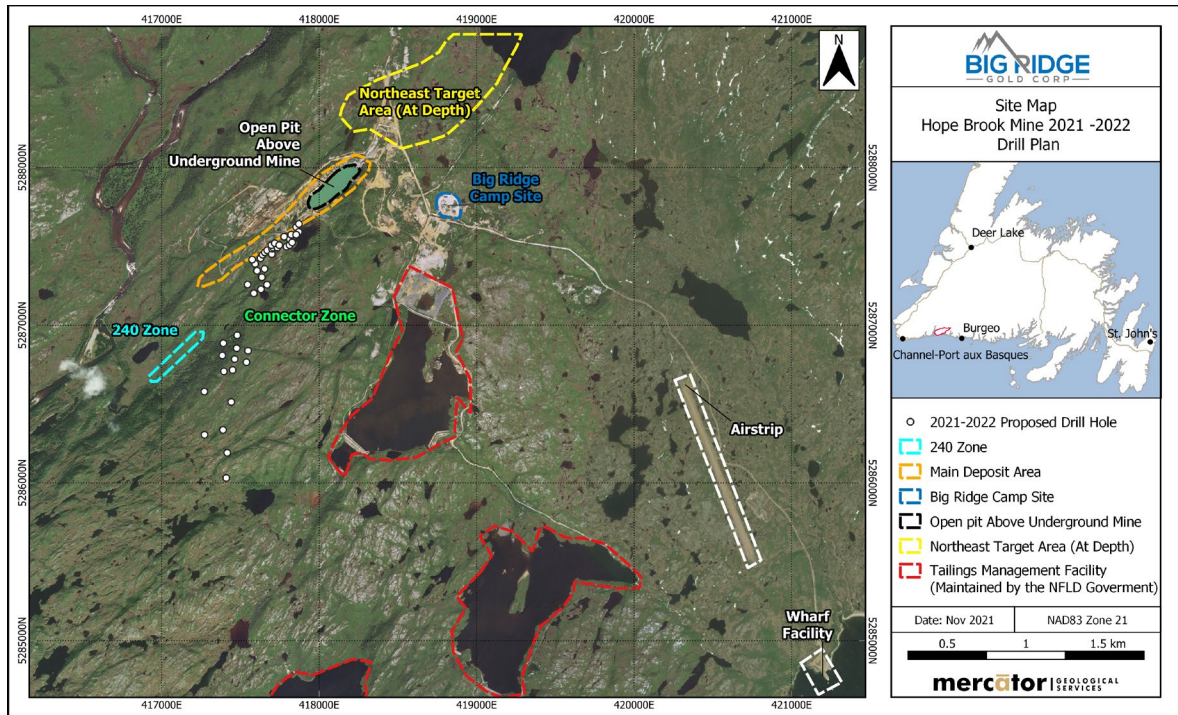

The Company has no cash flow from operations as its projects are at an exploration stage, and consequently financings and the proceeds from "farming out" non-core mineral property interests have been the primary sources of funds. Management regularly reviews expenditures and exploration programs and equity markets in order that the Company has sufficient liquidity to support its operations.

At March 31, 2022, the Company had cash of \$4,513,199 and working capital of \$3,984,494 reflecting the proceeds of the private placement of flow-through units which closed on June 30, 2021, generating aggregate gross proceeds of \$5,000,053, and a total of \$3,586,694 in proceeds from the exercise of warrants in the period ended March 31, 2022.

OUTLOOK

Hope Brook

The initial drill program at Hope Brook comprises 25,000 metres of drilling, focused primarily on the gap between the 240 and Main Zones at surface and to depth and strike extensions to the northeast as can be defined with new geophysical interpretation, as illustrated on the property map below.

Two drills are currently on site with camp operations currently supported by chartered fixed-wing aircraft based in Stephenville, Newfoundland. Drilling is expected to continue non-stop until completion of the program. At the date of this MD&A a total of 50 holes, drilling a total of 14,408 metres, have been completed. Assay results from a total of 25 holes have been released to date, with 100% of the holes intercepting gold mineralization. The results received to date confirm that near-surface mineralization to the southwest of the Hope Brook open pit resource boundary remains open for potential resource growth. The Company has also completed multi-element analysis on core samples and consistently assays for copper, an important potential by-product and metallurgical factor in the deposit. The Company intends to quantify copper in its next resource estimate.

The Company plans to revise the mineral resource estimate in the first half of fiscal 2023 once the drilling program is complete and assays have been received for all holes. This revised resource estimate will reflect up-to-date assumptions of gold pricing, changes to the cut-off grade that follow from the revised gold pricing assumptions, and the results of the drilling program to date. This work will serve as the foundation for a Preliminary Economic Assessment on the Hope Brook Gold Project planned for the second half of fiscal 2023.

Destiny

The Company has no plans to undertake any exploration work at Destiny at the date of this MD&A.

Oxford

In October 2021 representatives of the BCN indicated their willingness to allow the Company's archeological consultant to visit the Oxford property and the band itself to complete the HRIA. These visits had not taken place at the date of this MD&A, and it is not possible to say with certainty when this work will recommence.

RELATED PARTY TRANSACTIONS

During the three and nine months ended March 31, 2022 and 2021, the Company recognized the following costs in respect of services provided by related parties:

	Three months ended March 31		Nine months ended March 31

FULLY DILUTED SHARE CAPITAL

The table below presents the Company's fully diluted common share data as at the date of this MD&A.

Common shares	108,466,085
Shares issuable upon exercise of outstanding warrants	28,944,065
Outstanding options, of which 3,043,999 are exercisable	4,367,000
Total - fully diluted	141,777,150

OFF-BALANCE SHEET ARRANGEMENTS

The Company has no off-balance sheet arrangements, either at March 31, 2022 or subsequently to the date of this MD&A.

SUBSEQUENT EVENTS

Options

Subsequent to March 31, 2022, the Company issued 125,000 common shares pursuant to the exercise of options, generating proceeds of \$38,125.

Warrants

Subsequent to March 31, 2022, a total of 4,317,400 warrants exercisable in aggregate into 4,338,987 common shares at an exercise price of \$0.48, expired.

CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of the financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported expenses during the period. Actual results could differ from these estimates.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- The characterization of the Company's acquisition of the outstanding securities of Empress Resources Corp. as an acquisition of assets as opposed to a business combination.
- The carrying value and the recoverability of exploration and evaluation assets, which are included in the statements of financial position based on the planned exploration budgets and drill results of exploration programs.
- The inputs used in accounting for share-based compensation expense included in profit or loss calculated using the Black-Scholes option pricing model.
- The valuations of shares issued in non-cash transactions.
- The recognition of deferred tax assets based on the change in unrecognized deductible temporary tax differences.

DISCLOSURE FOR VENTURE ISSUERS WITHOUT SIGNIFICANT REVENUE

Additional disclosure concerning the Company's general and administrative expenses and mineral property acquisition and exploration costs is provided in the Company's condensed interim consolidated financial statements for the period ended March 31, 2022. These financial statements are available on the Company's website at www.bigridgegold.com or on SEDAR at www.sedar.com.

DIVIDENDS

As discussed under the heading "Acquisition of Empress Resources and concurrent financing", during the year ended June 30, 2021, the Company declared a special dividend of Royalty shares to its shareholders of record on July 2, 2020 in accordance with the terms of the Transaction.

Shareholders of the Company received 0.41 of a Royalty share for each share held of the Company at the record date.

Other than this special dividend, Big Ridge has not paid a dividend since inception and has no plans to pay dividends for the foreseeable future.

LEGAL PROCEEDINGS

At March 31, 2022 and subsequently to the date of this MD&A, there were no legal proceedings involving the Company.

DISCLOSURES ABOUT RISKS

Big Ridge is subject to the usual risks associated with a junior mineral exploration company. The Company competes for access to financing, specialized third-party service providers and human capital against other exploration companies, some of whom may be better capitalized. The price of gold, the principal metal contained within Big Ridge's mineral exploration properties, has fluctuated significantly over the past few years and may continue to do so. Such volatility may affect the timing and magnitude of funds which the Company may seek to raise to support further exploration of its properties or may make it difficult or impossible for the Company to complete an offering of securities.

Resource acquisition, exploration, development, and mining is a highly speculative business that involves significant risks, which even a combination of careful evaluation, experience and knowledge may not eliminate. While the discovery of precious metals and other minerals may result in substantial rewards, few properties that are explored are ultimately developed into producing mines. Major expenses may be required to locate and establish economically viable mineral deposits, to develop metallurgical processes and to construct mining and processing facilities at a particular site. It is impossible to ensure that the acquisition, exploration or development programs planned by the Company will result in a profitable commercial mining operation. The potential for any project to eventually become an economically viable operation depends on numerous factors including: the quantity and quality of the minerals discovered if any, the proximity to infrastructure, metal and mineral prices (which vary considerably over time) and government regulations. The exact effect these factors can have on any given exploration property cannot be predicted accurately, but the effect can be materially adverse.

Although management has used its best efforts to ensure title to properties in which it has interests, there is no guarantee that title to the properties will not be challenged or impugned. The Company's mineral property interests may be subject to prior unregistered agreements or transfers or land claims, and title may be affected by undetected defects.

In addition to the foregoing, Big Ridge is subject to a number of other risks and uncertainties which are not discussed in this MD&A. To properly understand such risks, readers are directed to the risk factors disclosed under the heading "Risk Factors" in Big Ridge's Annual Information Form for the year ended June 30, 2021 and other filings made with Canadian securities regulatory authorities, available on SEDAR at www.sedar.com.

FINANCIAL RISK MANAGEMENT

The Company's financial instruments are exposed to certain financial risks. The risk exposures and the impact on the Company's financial instruments are summarized below.

Interest rate risk

The Company has no material exposure at March 31, 2022 to interest rate risk through its financial instruments.

Sensitivity analysis

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are "reasonably possible" over a twelve-month period. Sensitivity to a plus

or minus .1% change in cash interest rates would affect net loss by \$4,000 annually. The Company does not hold any material balances in foreign currencies that could give rise to exposure to foreign exchange risk.

Currency risk

As at March 31, 2022, none of the Company's cash and cash equivalents was held in US dollars. The Company has no operations in foreign jurisdictions at this time and as such has no material currency risk associated with its operations.

Credit risk

The Company has cash balances and no interest-bearing debt. The Company has no significant concentrations of credit risk arising from operations. The Company's current policy is to invest excess cash in bank deposits or investment-grade short-term deposit certificates issued by Canadian financial institutions with which it keeps its bank accounts, and management believes the risk of loss to be remote.

Liquidity risk

The Company manages liquidity risk by maintaining sufficient cash balances. Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short-term obligations. As at March 31, 2022, the Company had a cash balance of \$4,513,199 (June 30, 2021: \$8,295,125) to settle current liabilities of \$1,304,110 (June 30, 2021: \$183,121).

ADDITIONAL INFORMATION

The Company's Annual Information Form for the year ended June 30, 2021 is available on SEDAR at www.sedar.com.
