Notes to the Interim Condensed Financial Statements

For the Nine-month Period Ended March 31, 2015

(Unaudited – Prepared by Management)

(Expressed in Canadian Funds)

1. Going concern and nature of operations

Alto Ventures Ltd. (“the Company”) is engaged in the acquisition, exploration and evaluation of Canadian gold and diamond projects. The head office is located at Suite 615 – 800 West Pender Street, Vancouver, British Columbia, V6C 2V6 and the registered and records office of the Company is located at Suite 1500, 1055 West Georgia Street, Vancouver, British Columbia V6E 4N7.

The Company presently has no proven or probable reserves and on the basis of information to date, it has not yet determined whether its properties contain economically recoverable ore reserves. The Company has not generated any revenues from its operations to date and consequently is considered to be in the exploration stage. The amounts shown as exploration and evaluation assets represent expenditures incurred to date, less amounts written off, and do not necessarily represent present or future values. The recoverability of the carrying amounts for exploration and evaluation assets is dependent upon raising financing, the sale or joint venturing of the exploration and evaluation assets, and/or the attainment of profitable operations.

These financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. The Company continues to incur operating losses, has limited financial resources, no source of operating cash flow, and no assurances that sufficient funding, including adequate financing, will be available to conduct further exploration and development of its exploration and evaluation projects. The Company’s ability to continue as a going concern is dependent upon its ability to obtain the financing necessary to complete the exploration of its mineral interests by the issuance of share capital or through joint ventures, and to realize future profitable production or proceeds from the disposition of its mineral interests. These material uncertainties may cast significant doubt about the Company’s ability to continue as a going concern. At March 31, 2015, the Company has working capital of \$328,167, incurred a loss for the nine-month period ended March 31, 2015 of \$810,742 and has an accumulated deficit of \$18,013,773.

Management plans to continue to secure the necessary financing through a combination of the issue of new equity instruments and entering into joint venture arrangements. However, there is no assurance that the Company will be successful in these actions. These financial statements do not give effect to adjustments to the carrying values and classification of assets and liabilities that would be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

2. Basis of preparation

Statement of Compliance

These interim financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting and interpretations of the IFRS Interpretations Committee (“IFRIC”). They have been prepared on a historical cost basis, except for financial instruments classified as financial instruments at fair value through profit or loss, which are stated at their fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information. The significant accounting policies, as disclosed, have been applied consistently to all periods presented in these financial statements.

Critical Accounting Estimates and Judgments

The preparation of these financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported expenses during the year. Actual results could differ from these estimates.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- i) The recoverability of receivables that are included in the statements of financial position based on historical collection of receivables.
- ii) The carrying value and the recoverability of exploration and evaluation assets, which are included in the statements of financial position based on the planned exploration budgets and drill results of exploration programs.
- iii) The inputs used in accounting for share-based compensation expense included in profit or loss calculated using the Black-Scholes option pricing model.
- iv) The valuations of shares issued in non-cash transactions using the quoted share price as the fair value based measurement on the date the shares are issued for the transaction.
- v) The recognition of deferred tax assets based on the change in unrecognized deductible temporary tax differences.

3. Significant accounting policies

Pronouncements Affecting Financial Statement Presentation and Disclosure

The adoption of the following new and amended IFRS pronouncements will result in enhanced financial statement disclosures in the Company's interim or annual consolidated financial statements or a change in financial statement presentation. These pronouncements did not affect financial results.

IFRS 12 – Disclosures of Interest in Other Entities

The Company adopted IFRS 12, Disclosures of Interests in Other Entities ("IFRS 12") on January 1, 2013. IFRS 12 outlines the disclosure requirements for interests in subsidiaries and other entities to enable users to evaluate the risks associated with interest in other entities and the effects of those interests on an entity's financial position, financial performance and cash flows.

The requirements of IFRS 12 relate to disclosures only and are applicable for the first annual period after adoption. IFRS 12 does not require the disclosures to be included for any period presented that precedes the first annual period for which IFRS 12 is applied. The adoption of IFRS 12 did not have an effect on the Company's financial statements for the nine-month period ended March 31, 2015.

IFRS 13 - Fair Value Measurement

Alto Ventures Ltd.

(An Exploration Company)

Notes to the Interim Condensed Financial Statements

For the Nine-month Period Ended March 31, 2015

(Unaudited – Prepared by Management)

(Expressed in Canadian Funds)

The Company adopted IFRS 13, Fair Value Measurement (“IFRS 13”) with prospective application from January 1, 2013. IFRS 13 defines fair value, sets out a single IFRS framework for measuring fair value and outlines disclosure requirements for fair value measurements. IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is a market-based measurement, not an entity-specific measurement, so assumptions that market participants would use should be applied in measuring fair value. The adoption of IFRS 13 did not have an effect on the Company’s financial statements for the six-month period ended December 31, 2014.

Pronouncements Affecting Accounting Policies Only

The adoption of the following new IFRS pronouncements did not affect the Company’s financial results or disclosures as the Company’s analysis of these new IFRS pronouncements determined that no changes were required to the Company’s existing accounting treatments.

IFRS 10 - Consolidated Financial Statements

The Company adopted IFRS 10, Consolidated Financial Statements (“IFRS 10”) on January 1, 2013 with retrospective application. IFRS 10 establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities. This IFRS defines the principle of control and establishes control as the basis for determining which entities are consolidated in an entity’s financial statements. IFRS 10 sets out three elements of control: power over the investee; exposure, or rights, to variable returns from involvement with the investee; and the ability to use power over the investee to affect the amount of investors’ return; and the requirements on how to apply the control principle.

IFRS 10 - Consolidated Financial Statements - continued

IFRS 10 supersedes IAS 27, Consolidated and Separate Financial Statements and Standing Interpretations Committee (“SIC”) 12, Consolidation – Special Purpose Entities.

Based on the Company’s analysis, IFRS 10 did not have an effect on the Company’s financial statements for the nine-month period ended March 31, 2015 as the Company currently does not have any subsidiaries or special purpose entities.

IFRS 11 – Joint Arrangements

The Company adopted IFRS 11, Joint Arrangements (“IFRS 11”) on January 1, 2013. If an arrangement results in joint control, IFRS 11 classifies joint arrangements as either joint operations or joint ventures, depending on the rights and obligations of the parties involved. The Company also adopted IAS 28(R), Investments in Associates and Joint Ventures (“IAS 28”) which included amendments to address accounting for joint ventures.

A joint operation is an arrangement where the jointly controlling parties have rights to the assets and obligations in respect of the liabilities of the arrangement. An entity accounts for a joint operation by recognizing its portion of the assets, liabilities, revenues and expenses. A joint venture is an arrangement where the jointly controlling parties only have rights to the net assets of the arrangement. A joint venture is accounted for using the equity method.

Based on the Company’s analysis, IFRS 11 did not have an effect on the Company’s financial statements for the six-month period ended December 31, 2014 presented as the Company currently does not have any joint arrangements.

4. Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure for its projects for the benefit of its stakeholders. As the Company is in the exploration stage, its principal source of funds is from the issuance of common shares.

In the management of capital, the Company includes the components of shareholders' equity. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, enter into joint venture property arrangements, acquire or dispose of assets or adjust the amount of cash and investments. In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The annual and updated budgets are approved by the Board of Directors.

5. Management of financial risk

The Company's financial instruments are exposed to certain financial risks. The risk exposures and the impact on the Company's financial instruments are summarized below.

Interest rate risk

The Company has no material exposure at December 31, 2014 to interest rate risk through its financial instruments.

Sensitivity analysis

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are "reasonably possible" over a three month period. Cash and short-term investments include deposits, which are at variable interest rates. Sensitivity to a plus or minus 1% change in rates would affect net loss by \$4,887 annually. The Company does not hold any balances in foreign currencies to give rise to exposure to foreign exchange risk.

Currency risk

As at March 31, 2015, all of the Company's cash was held in Canadian dollars, the Company's reporting currency. The Company has no operations in foreign jurisdictions at this time and as such has no currency risk associated with its operations.

Credit risk

The Company has some cash balances and no interest-bearing debt. The Company has no significant concentrations of credit risk arising from operations. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by Canadian financial institutions with which it keeps its bank accounts and management believes the risk of loss to be remote.

Notes to the Interim Condensed Financial Statements

For the Nine-month Period Ended March 31, 2015

(Unaudited – Prepared by Management)

(Expressed in Canadian Funds)

Receivables consist of long-term accounts receivable, goods and services tax (“GST”) due from the Federal Government of Canada, an amount due from the Government of Quebec in respect of Quebec exploration tax credits, and interest on a term deposit. With regards to the long-term accounts receivable, during the nine-month period ended March 31, 2015, the Company signed an amended agreement and received \$50,000 as part of the terms under the amended agreement, and a further \$50,000 was received subsequent to March 31, 2015. The Company’s investment policy is to invest its cash in highly liquid short-term interest-bearing investments with maturities 90 days or less from the original date of acquisition, selected with regards to the expected timing of expenditures from continuing operations. Management believes the risk to be minimal.

Liquidity risk

The Company manages liquidity risk by maintaining sufficient cash balances. Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short-term obligations. As at March 31, 2015, the Company had a cash balance of \$108,519 (June 30, 2014: \$52,201) available to settle current liabilities of \$86,294 (June 30, 2014: \$61,223).

6. Receivables

Current accounts receivable balance includes \$14,304 (June 30, 2014: \$14,915) in GST due from the Federal Government, \$587 receivable from the Government of Quebec, and \$52 (June 30, 2014: \$52) in accrued term deposit interest.

The long-term receivable balance consists of \$200,000 (June 30, 2014: \$500,000) due from Canoe Mining Ventures Corp. (formerly Foundation Resources Inc.) (“Canoe”) from the sale of the Coldstream exploration and evaluation asset (*See Note 9c*) (\$50,000 received subsequent to March 31, 2015). The Canoe receivable is secured by a collateral debenture whereby the Company’s original interest in the property will revert back to the Company in the event of non-payment.

During the nine-month period ended March 31, 2015, the Company entered into settlement agreement with Canoe to settle the terms and conditions of their debenture agreement held against the Coldstream mineral property (*See Note 9c*). During the year ended June 30, 2014, the Company wrote down the long-term accounts receivable balance by \$254,972 based on revised, on-going negotiations to re-structure the terms of the agreement in light of the current difficult financial markets.

During the year ended June 30, 2014, the Company recorded \$28,043 as a bad debt write off from amounts due from the Quebec government relating to its exploration tax credit receivable due to re-assessment of amounts claimed by the Company.

7. Current liabilities

The Company’s current liabilities include accounts payable of \$10,420 (June 30, 2014: \$23,694) accrued liabilities of \$72,599 (June 30, 2014: \$30,000), and amount owing to related parties of \$3,275 (June 30, 2014: \$7,529).

Notes to the Interim Condensed Financial Statements

For the Nine-month Period Ended March 31, 2015

(Unaudited – Prepared by Management)

(Expressed in Canadian Funds)

a) Alcudia Property, Quebec

The Alcudia property is 100% owned by the Company and subject to certain underlying royalties. The Company owns a 0.5% Net Smelter Royalty (“NSR”) on any production from the adjoining Windfall property. During the year ended June 30, 2014, the Company sold the 0.5% NSR. *(See Note 8)*

b) Coldstream Property, Ontario

The Coldstream property is located in the Shebandowan greenstone belt west of Thunder Bay, Ontario.

On January 18, 2011, Canoe had earned 60% interest in the Coldstream property and future exploration work would be completed and funded 40% by the Company and 60% by Canoe.

On February 16, 2012, the Company completed the sale of its 40% interest in the Coldstream property to Canoe. This consolidation in ownership gives Canoe a 100% interest in the property. In consideration for the acquisition of the Company’s 40% interest, Canoe paid \$350,000 in cash and issued 10,000,000 common shares of Canoe at a fair value of \$1,300,000. Within six months, Canoe was to pay to the Company a further \$950,000 in cash, subject to a potential three month extension period, for a total consideration of \$2,600,000 in cash and shares.

As part of the agreement the Company will vote in support of Canoe management for a period of three years and will not tender its shares to any take-over bid not recommended by Canoe’s Board of Directors.

On June 27, 2012, the Company entered into an amending agreement with Canoe concerning the consolidation of its ownership in the Coldstream property. Pursuant to the amending agreement, the remaining \$950,000 (the “Balance”) will be paid by Canoe through the payment of a minimum of 20% of the aggregate net proceeds of any non-flow through equity financing completed by Canoe, provided however that the Balance must be paid in full not later than November 21, 2013 (the “Due Date”). Canoe will pay to the Company, in addition to the Balance, a fee of 5% of the Balance amount outstanding as at November 21, 2012 (the “First Extension Fee”), of which a deposit of \$21,000 (received) will be paid towards the First Extension Fee and the balance of such First Extension Fee will be due and payable by Canoe within five Business Days of November 21, 2012. During the year-ended June 30, 2013, Canoe paid the Company \$126,581 and an additional \$57,258 representing 20% of the net proceeds of their equity financings and the Company received \$20,171 representing the balance of the remaining first extension fee.

Canoe retains the right to extend the Due Date to May 21, 2014 (the “Extension Right”). As consideration for the second Extension Right, if exercised, Canoe shall pay to Alto 5% of the remaining Balance amount outstanding as at November 21, 2013.

During the nine-month period ended March 31, 2015, the Company entered into a settlement agreement with Canoe to settle the terms and conditions of their debenture agreement held against the Coldstream mineral property. The terms of the revised agreement are as follows:

- a) Issue 1,250,000 common shares (received) in the capital of Canoe having a value of \$250,000 based on a deemed price per share of \$0.20.

(Expressed in Canadian Funds)

- b) Payment of the sum of \$50,000 (received) on the Settlement Date;
- c) Payment of a further \$50,000 on or before December 31, 2014 (received subsequent to March 31, 2015);
- d) Payment of a further \$75,000 on or before March 31, 2015;
- e) Payment of a further \$75,000 on or before June 30, 2015; and
- f) The granting of a net smelter returns royalty ranging from 0.5% to 1.5% on certain portions of the Coldstream property.

In addition to the terms above, Canoe has the option to purchase 400,000 shares (347,300 purchased to date) of their own stock held by the Company with the share consideration equal to the deemed price at which the settlement shares were issued.

- c) Cote-Archie Lake Property, Ontario

The Cote-Archie Lake property is 100% owned by the Company and subject to certain underlying royalties on some of the claims. During the year ended June 30, 2014, the Company allowed certain claims to expire as no further work is planned which resulted in a write-down of acquisition costs capitalized of \$25,385.

- d) Destiny (formerly Despinassy) Property, Quebec

The Destiny Project is located in Despinassy Township, northeast of Val d'Or, Quebec. The property is 100% owned by the Company and subject to certain underlying production royalties on some of the claims. During the year ended June 30, 2014, the Company allowed certain claims to expire as no further work is planned which resulted in a write-down of acquisition costs capitalized of \$235,988.

- e) Dolsan, Quebec

The Company owns 100% interest in this property subject to certain underlying royalties on some of the claims. During the year ended June 30, 2014, the Company allowed certain claims to expire as no further work is planned which resulted in a write-down of acquisition costs capitalized of \$3,444.

- f) Greenoaks Property, Ontario

The Company owns 100% interest in this property subject to certain underlying royalties.

- g) Miner Lake, Ontario

The Company owns a 100% interest in the Miner Lake property subject to certain underlying royalties on some of the claims.

- h) Mud Lake Property, Ontario

The Company owns a 100% interest in the Mud Lake property subject to certain underlying royalties on some of the claims.

i) Obalski, Quebec

The Company owns 100% interest in this property located northwest of Val d'Or, Quebec. During the year ended June 30, 2014, the Company allowed certain claims to expire as no further work was planned, resulting in a write-down of acquisition costs capitalized of \$4,108.

j) Oxford Lake, Manitoba

The Company owns a 100% interest in the Oxford Lake Property subject to certain underlying royalties on some of the claims.

During the year ended June 30, 2014, the Company entered into an exploration and option agreement with Razore under which Razore can earn up to 60% working interest in the Oxford Lake Gold Property ("Property"). Razore issued 100,000 common shares and paid \$10,000 to the Company on the closing of the transaction.

Razore can earn a 51% working interest in the Property by issuing a further 500,000 common shares, paying a further \$50,000 in cash option payments and incurring \$2,100,000 in expenditures on the Property by December 30, 2016.

On April 15, 2014 Razore Rock Resources Inc. received an extension from the Company to fulfill certain commitments under the Oxford Exploration and Option Agreement. In consideration for the extension, Razore Rock issued 100,000 of its shares to the Company. On May 15, 2014 Razore Rock served notice that it has terminated the Oxford Lake Exploration and Option Agreement.

k) Three Towers, Ontario

The Company owns 100% interest in this property subject to certain underlying royalties.

l) Vassal, Quebec

The Company owns a 100% interest in this property located north of Val d'Or, Quebec. During the year ended June 30, 2014, the Company allowed certain claims to expire as no further work is planned which resulted in a write-down of acquisition costs capitalized of \$4,058.

m) La Ronge, Saskatchewan

During the year ended June 30, 2014, the Company staked several mineral claims in Northern Saskatchewan.

n) GEFA Option, Saskatchewan

The Company has entered into an Option Agreement to acquire a 60% interest in four mining claims (the "GEFA Option") in northern Saskatchewan.

The four GEFA claims are located east of the Town of La Ronge, Saskatchewan. Under the terms of the GEFA Option Agreement, the Company can earn a 60% interest in the four claims by making staged cash payments to the vendors of \$5,000 on signing (paid), \$20,000 after year one (paid) and \$35,000 after year two totaling \$60,000 and completing \$250,000 in exploration within one year and a
