MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis ("MD&A") of Big Ridge Gold Corp. ("Big Ridge" or "the Company") provides information relevant to an assessment and understanding of the financial condition and results of operations of the Company. This MD&A should be read in conjunction with the Company's condensed interim consolidated financial statements for the three months ended September 30, 2024 and 2023 and the notes thereto, which have been prepared in accordance with IFRS Accounting Standards ("IFRS") as issued by the International Accounting Standards Board.

This MD&A includes information available to November 25, 2024. Unless otherwise stated, all currency amounts are stated in Canadian dollars, and all financial information provided in this MD&A is prepared in accordance with IFRS.

FORWARD LOOKING INFORMATION

Certain information contained in this MD&A constitutes forward-looking information within the meaning of Canadian securities laws ("forward-looking statements"). All statements in this MD&A, other than statements of historical fact, which address events, results, outcomes or developments that Big Ridge expects to occur are forward-looking statements.

Forward-looking statements relate to future events or future performance and reflect management's expectations or beliefs regarding future events and include, but are not limited to, statements with respect to the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the timing and amount of estimated future production, costs of production, capital expenditures, success of mining operations, environmental risks, permitting risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved" or the negative of these terms or comparable terminology. By their very nature forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; future prices of resources; possible variations in ore reserves, grade or recovery rates; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities; as well as those factors detailed from time to time in the Company's interim and annual financial statements which are filed and available for review on SEDAR+ at www.sedarplus.com. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

Other than as specifically required by law, Big Ridge undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made, or to reflect the occurrence of unanticipated events, whether as a result of new information, future events or results otherwise.

QUALIFIED PERSONS AND CAUTIONARY NOTE REGARDING MINERAL RESOURCES

The disclosure in this MD&A of information of a scientific or technical nature for the Company's Hope Brook Gold Project ("HBGP"), including disclosure of mineral resources, is based on the HBGP Technical Report (as hereinafter defined) prepared in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("**NI 43-101**"), as summarized under "Hope Brook Gold Project" in this MD&A, and other information that has been prepared by or under the supervision of "qualified persons" (as such term is defined in NI 43-101) with the consent of such persons. The HBGP Technical Report has been filed on SEDAR+ and can be reviewed at www.sedarplus.com. Actual recoveries of mineral products may differ from reported mineral reserves and resources due to inherent uncertainties in acceptable estimating techniques. In particular, "indicated" and "inferred" mineral resources have a greater amount of uncertainty as to their existence, economic and legal feasibility. It cannot be assumed that all or any part of an "indicated" or "inferred" mineral resource will ever be upgraded to a higher category of mineral resource or, ultimately, a mineral reserve. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Investors are cautioned not to assume that all or any part of a mineral deposit with resources in these categories will ever be converted into proven or probable reserves.

Except where specifically indicated otherwise, the scientific and technical information contained in this MD&A was reviewed and approved by William McGuinty, P.Geo., Vice President Exploration for the Company, a Qualified Person in accordance with NI 43-101.

CAUTIONARY NOTE TO U.S. INVESTORS

This MD&A has been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ materially from the requirements of United States securities laws applicable to U.S. companies. For U.S. reporting purposes, the United States Securities and Exchange Commission (the "SEC") has adopted amendments to its disclosure rules (the "SEC Modernization Rules") to modernize the mineral property disclosure requirements for issuers, referred to as "mining registrants", whose securities are registered with the SEC. These amendments became effective in February 2019 with compliance required for the first fiscal year beginning on or after January 1, 2021. While not applicable to Big Ridge, the SEC Modernization Rules replace the historical property disclosure requirements for mining registrants that were included in SEC Industry Guide 7, which will be rescinded from and after the required compliance date of the SEC Modernization Rules. Information concerning our mineral properties has been prepared in accordance with the requirements of Canadian securities laws, which differ in material respects from the requirements of the SEC set forth in Industry Guide 7. In accordance with NI 43-101, the terms "mineral reserve", "proven mineral reserve", "probable mineral reserve", "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" are defined in accordance with CIM standards. Whereas the terms "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" are recognized and required by NI 43-101 and are now recognized under the SEC Modernization Rules, SEC Industry Guide 7, does not recognize them. Readers of this MD&A are cautioned that mineral resources do not have demonstrated economic viability. Inferred mineral resources have a high degree of uncertainty as to their existence and as to whether they can be economically or legally mined. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Therefore, readers are cautioned not to assume that all or any part of an inferred mineral resource exists, that it can be economically or legally mined, or that it will ever be upgraded to a higher category. Likewise, readers are cautioned not to assume that all or any part of measured mineral resources or indicated mineral resources will ever be upgraded into mineral reserves.

OVERVIEW OF BIG RIDGE

Big Ridge is focused on the acquisition, exploration and development of precious-metals properties located in Canada. The Company was incorporated under the provisions of the Business Corporations Act (British Columbia) on June 6, 1987. The Company is listed on the TSX Venture Exchange as a Tier 2 mining issuer under the trading symbol BRAU and is a reporting issuer in the provinces of British Columbia and Alberta.

During the three months ended September 30, 2024, the Company continued to advance the HBGP. At the date of this MD&A the Company has an 80% interest in the HBGP. Big Ridge considers the HBGP its only material resource property interest.

In addition, the Company owns 100% interests in the following resource properties:

- The Destiny Gold Property in Quebec. The Company has no plans to undertake exploration activities at the Destiny property in the foreseeable future and has entered into discussions with interested parties in an effort to either sell or option the property.

On September 24, 2024, the Company announced that it had entered into a non-binding letter of intent with Caprock Mining Corp. covering the farm-out of a 100% interest in the Destiny property. To the date of this MD&A, discussions with Caprock had not progressed to the point of a definitive option agreement, and there is no assurance that this will occur.

- The Oxford Gold Property in Manitoba. Big Ridge has entered into an Exploration Agreement with the Bunibonibee Cree Nation ("BCN"), which will enable the Company to recommence exploration activity at Oxford once a Heritage Resource Impact Assessment ("HRIA") can be completed. The completion of this study and any consideration of commencing exploration activities at Oxford has been and continues to be delayed by the decision of the BCN not to allow the Company's archeological consultant to conduct in-person interviews with band elders, a critical component of the HRIA workplan.

OPERATIONAL HIGHLIGHTS

Financing

On September 18, 2024 the Company closed a non-brokered private placement of 30,000,000 common shares at a price of \$0.05 per share, raising aggregate gross proceeds of \$1,500,000. No finder's fees or compensation warrants were issued in connection with this financing.

Exploration at Hope Brook

During the three-month period ended September 30, 2024, the Company completed baseline environmental studies at Hope Brook, which included the following:

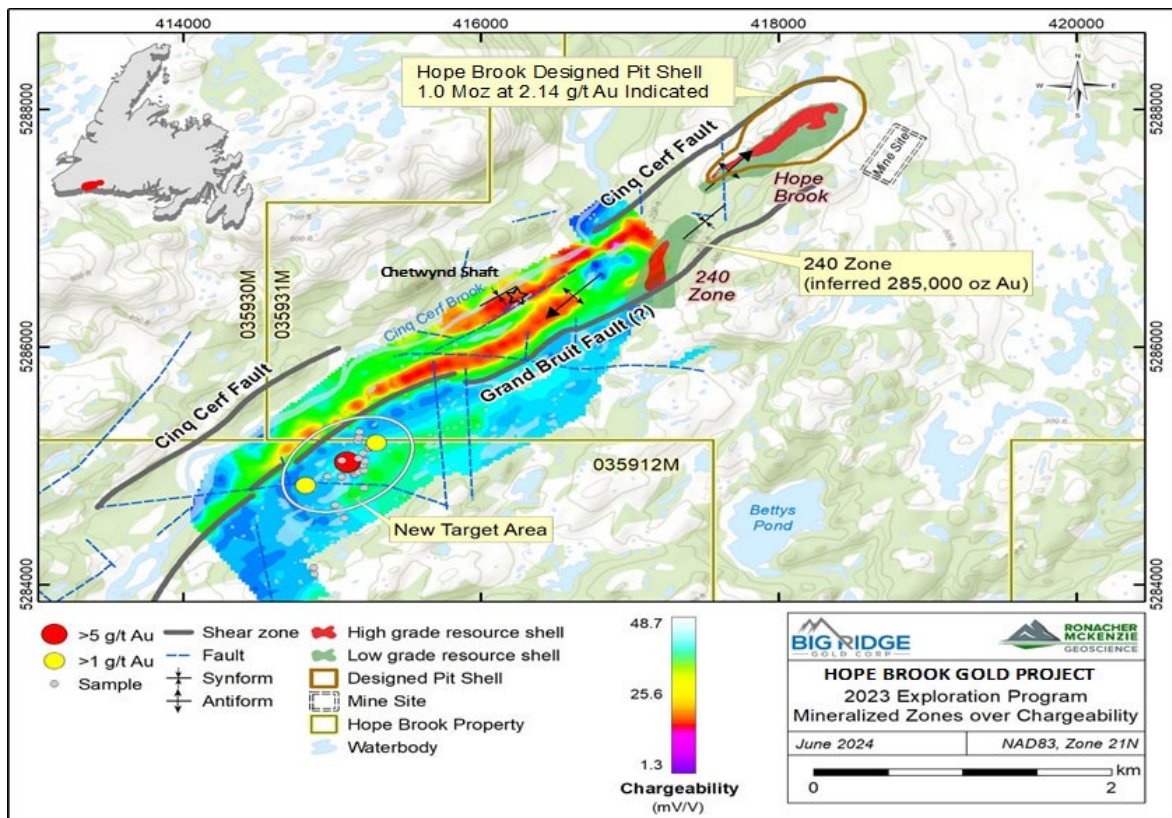

- Fish community and habitat assessment;
- Benthic (bottom-dwelling) macroinvertebrate community assessment;
- Mammal and avian surveys;
- Surface and groundwater sampling; and
- Sediment and soil sampling.

The fieldwork associated with this baseline program is complete at the date of this MD&A, and the reporting by the consultant retained to complete the fieldwork is expected by the end of the second quarter of the 2025 fiscal year.

The results of the environmental studies, which built on work completed in 2010 by Coastal Gold Corp., a subsidiary of First Mining and the previous operator of the project, will form a component of the Company's project description, the first step in the environmental assessment needed for Project Registration of the HBGP under Newfoundland regulations.

In addition, the Company completed fieldwork programs focused on prospecting, trenching and sampling at targets identified by the 2023 geophysics program in a 5 km section of the Cinq Cerfs deformation zone, which extends from the 240 Zone to the southwest. This work followed on from DC Induced Polarization, magnetometer, and reconnaissance surveys completed in 2023 and was done in advance of a potential return to drilling at Hope Brook in 2025. This work, which was completed in October 2024, will assist in the placement of holes at Cinq Cerfs. Assays from this work are outstanding at the date of this MD&A.

In the course of completing the fieldwork program, Big Ridge's exploration team reviewed core from 9 shallow historical drill holes completed near the Chetwynd shaft by Coastal Gold in 2010. The team conducted a core re-sampling program to investigate all lithologies and alteration present in these holes to more fully evaluate the Cinq Cerfs area.

Ore-sorting and gold deportment

During the period ended September 30, 2024, the Company sent approximately 150 kg of samples of mineralized material from the Main and 240 Zones, consisting of varying grades and alteration characteristics, to the Saskatchewan Research Council ("SRC") for a test work program intended to determine the amenability of mineralized material contained within the current mineral resource wireframes to ore separation. Zero grade material accounts for 20-25% of the volume of the current wireframes, and the ability to segregate zero grade material prior to processing could significantly improve the economics of processing material from these pits.

This work is underway at the date of this MD&A and consists of two test phases:

- A success-based dynamic test on the samples referred to above, and
- A performance test on an additional sample of one tonne of material, focused on selectively removing mafic and intermediate dyke rocks to assess the feasibility of ore separation.

In addition, SRC will complete a gold deportment study on selected samples of mineralized material to assess the distribution of gold and other metallic elements and their interrelationships, including copper.

MINERAL PROPERTY INTERESTS

Hope Brook Gold Project:

On April 6, 2021, Big Ridge entered into an earn-in agreement with First Mining Gold Corp. (“First Mining”), pursuant to which the Company may earn an interest of up to 80% in the HBGP, a past producing mine located in Newfoundland and Labrador. This transaction closed on June 8, 2021.

The earn-in was comprised of two stages, as described below:

- To exercise its first earn-in right to acquire a 51% interest in the Hope Brook Gold Project, the Company was required to incur and fund expenditures on the HBGP of no less than \$10,000,000 by June 8, 2024 and to issue an additional 15,000,000 common shares to First Mining.

On September 13, 2022, the Company met the expenditure requirements necessary to satisfy the first earn-in threshold set out in the Hope Brook option agreement and issued a total of 15,000,000 common shares to First Mining with an aggregate fair value of \$1,950,000, completing the first earn-in related to the Hope Brook project, gaining an initial 51% interest in the project, and becoming party to a joint venture agreement for the HBGP with First Mining (49% interest). Concurrently with the creation of the joint venture, the joint venture entity granted to First Mining a 1.5% net smelter returns royalty on the HBGP, subject to a right of the Company to buy back 0.5% for \$2 million.

- To earn an additional 29% interest in the HBGP, the Company was required to incur an additional \$10 million in expenditures on the project by June 8, 2026. Upon achieving this final expenditure threshold and issuing a maximum of 10,000,000 additional common shares (“Stage 2 Shares”) to First Mining, subject to the approval of the TSX Venture Exchange, Big Ridge would have become the holder of an 80% interest in the HBGP.

Amendment to the Hope Brook Earn-in Agreement

Immediately prior to the amendment to the terms of the Stage 2 earn-in, described below, Big Ridge had incurred eligible exploration expenses for the purpose of the Hope Brook earn-in amounting to approximately \$5.8 million, with a further \$4.2 million in expenditures required by June 8, 2026 to meet the expenditure requirements set out in the earn-in agreement to increase its interest to 80%.

On March 21, 2024, the Company entered into an amending agreement with First Mining, pursuant to which the Company and First Mining agreed to terminate the provisions of the earn-in agreement that related to the Stage 2 earn-in. Following this, First Mining granted the Company a revised Second Stage Earn-In right to increase its ownership in the HBGP from 51% to 80%, subject to:

- the Company issuing a total of 10,000,000 common shares to First Mining (the “Revised Stage 2 Shares”), and
- management arranging for a group of investors to enter into definitive agreements to acquire from First Mining a total of 36,500,000 common shares of the Company.

The Company issued the Revised Stage 2 Shares referred to above on March 28, 2024, and definitive agreements covering the sale by First Mining of its investment in the common shares of the Company were executed prior to the issuance of the Revised Stage 2 shares. Consequently, at September 30, 2024 the Company's interest in the mineral licences which underly the HBGP amounted to 80%.

With the Stage 2 earn-in having been completed, the Company will solely fund all expenditures on the project up to and including the date on which the Company announces the results of a feasibility study on the project, at which time First Mining's free-carry period will terminate. In addition, upon the commencement of commercial production at the project, Big Ridge will pay \$2 million to First Mining, an obligation which survives the amendments to the earn-in agreement.

MINERAL RESOURCE ESTIMATE

At September 30, 2024, the HBGP hosts an open-pit and underground gold resource, as described below. The resource table and the related notes are excerpted from the NI 43-101 Technical Report entitled "*Mineral Resource Estimate Update for the Hope Brook Gold Project, Newfoundland and Labrador, Canada*", prepared by Allan Armitage, Ph.D., P. Geo., and Ben Eggers, MAIG, P. Geo., issued April 6, 2023, with an effective date of January 17, 2023 (the "HBGP Technical Report").

Hope Brook Project Gold Mineral Resource Estimate, effective January 17, 2023

| IN PIT | | | | |
|-------------------------------|------------------------|------------|----------------|-----------------------|
| Hope Brook | Cut-off Grade (g/t Au) | Tonnes | Grade (Au g/t) | Contained Gold Ounces |
| INDICATED | | | | |
| Main Zone | 0.4 | 14,584,000 | 2.14 | 1,002,000 |
| UNDERGROUND | | | | |
| Hope Brook | Cut-off Grade (g/t Au) | Tonnes | Grade (Au g/t) | Contained Gold Ounces |
| INDICATED | | | | |
| 240 Zone | 2.0 | 544,000 | 4.31 | 75,000 |
| Main Zone | 2.0 | 1,062,000 | 3.78 | 129,000 |
| INFERRED | | | | |
| 240 Zone | 2.0 | 1,994,000 | 3.28 | 210,000 |
| Main Zone | 2.0 | 221,000 | 2.96 | 21,000 |
| IN PIT AND UNDERGROUND | | | | |
| Hope Brook | Cut-off Grade (g/t Au) | Tonnes | Grade (Au g/t) | Contained Gold Ounces |
| INDICATED | | | | |
| 240 Zone | 2.0 | 544,000 | 4.31 | 75,000 |
| Main Zone | 0.4 and 2.0 | 15,646,000 | 2.25 | 1,131,000 |
| INFERRED | | | | |
| 240 Zone | 2.0 | 1,994,000 | 3.28 | 210,000 |
| Main Zone | 2.0 | 221,000 | 2.96 | 21,000 |

Notes:

- (1) The classification of the current Mineral Resource Estimate into Indicated and Inferred is consistent with current 2014 CIM Definition Standards - For Mineral Resources and Mineral Reserves.
- (2) All figures are rounded to reflect the relative accuracy of the estimate.

- (3) *All Resources are presented undiluted and in situ, constrained by continuous 3D wireframe models, and are considered to have reasonable prospects for eventual economic extraction.*
- (4) *Mineral resources which are not mineral reserves do not have demonstrated economic viability. An Inferred Mineral Resource has a lower level of confidence than that applying to a Measured and Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of Inferred Mineral Resources could be upgraded to Indicated Mineral Resources with continued exploration.*
- (5) *The update MRE is based on data for 763 surface and underground drill holes representing 164,865 m of drilling, including data for 60 surface drill holes for 19,090 m completed by Big Ridge in 2021 and 2022.*
- (6) *The mineral resource estimate is based on 2 three-dimensional ("3D") resource models for the Main Zone and 240 Zones.*
- (7) *High grade capping was done on the 1.5 m composite data. A Capping value of 50 g/t Au was to the Main Zone and 40 g/t Au for the 240 Zone.*
- (8) *Average density values were assigned per zone.*
- (9) *Gold is estimated for each mineralization domain. Blocks (5x5x5) within each mineralized domain were interpolated using 1.5 metre capped composites assigned to that domain. To generate grade within the blocks, the inverse distance squared (ID²) interpolation method was used for all domains.*
- (10) *It is envisioned that parts of the Main Zone may be mined using open pit mining methods. Open pit mineral resources are reported at a base case cut-off grade of 0.4 g/t Au within a conceptual pit shell.*
- (11) *It is envisioned that parts of the Main Zone as well as the 240 Zone may be mined using underground mining methods. A selected base case cut-off grade of 2.0 g/t Au is used to determine the underground mineral resource for the Main Zone and 240 Zone. The underground Mineral Resource grade blocks were quantified above the base case cut-off grade, below the constraining pit shell and within the constraining mineralized wireframes.*
- (12) *Base case cut-off grades consider a metal price of US\$1750.00/oz Au and considers a metal recovery of 86 % for Au.*
- (13) *The pit optimization and in-pit base case cut-off grade of 0.4 g/t Au considers a mining cost of US\$2.65/t rock and processing, treatment and refining, transportation and G&A cost of US\$15.60/t mineralized material, and an overall pit slope of 55°. The underground base case cut-off grade of 2.0 g/t Au considers a mining cost of US\$54.00/t rock and processing, treatment and refining, transportation and G&A cost of US\$15.55. The cut-off grades should be re-evaluated in light of future prevailing market conditions (metal prices, exchange rates, mining costs etc.).*
- (14) *The results from the pit optimization are used solely for the purpose of testing the "reasonable prospects for economic extraction" by an open pit and do not represent an attempt to estimate mineral reserves. There are no mineral reserves on the Property. The results are used as a guide to assist in the preparation of a Mineral Resource statement and to select an appropriate resource reporting cut-off grade.*
- (15) *The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, socio-political, marketing, or other relevant issues. There is no certainty that all or any part of the Inferred Mineral Resource will be upgraded to an Indicated or Measured Mineral Resource as a result of continued exploration. There is no other relevant data or information available that is necessary to make the technical report understandable and not misleading.*
- (16) *The Author is not aware of any known mining, processing, metallurgical, environmental, infrastructure, economic, permitting, legal, title, taxation, socio-political, or marketing issues, or any other relevant factors not reported in this technical report, that could materially affect the updated MRE.*

The details of the copper mineral resource estimate presented below are excerpted from the press release dated February 21, 2023.

Hope Brook Project Copper Mineral Resource Estimate, effective January 17, 2023

| Category | In-pit @ 0.40 g/t Au cut-off | | |
|-----------------|--------------------------------|--------|------------|
| | Tonnes | Cu (%) | Cu (lbs) |
| Inferred | | | |
| Main Zone | 14,584,000 | 0.12 | 39,328,000 |
| Category | Below-pit @ 2.0 g/t Au cut-off | | |
| | Tonnes | Cu (%) | Cu (lbs) |
| Inferred | | | |
| 240 Zone | 2,538,000 | 0.08 | 4,479,000 |
| Main Zone | 1,283,000 | 0.12 | 3,195,000 |
| Category | Total | | |
| | Tonnes | Cu (%) | Cu (lbs) |
| Inferred | | | |
| 240 Zone | 2,538,000 | 0.08 | 4,479,000 |
| Main Zone | 15,867,000 | 0.12 | 42,523,000 |

Management believes the current Technical Report provides significant potential to further increase the mineral resource associated with the Hope Brook deposit, at and below, and down-plunge from, the existing Main and 240 Zones.

SUMMARY OF FINANCIAL RESULTS

The Company's consolidated results of operations for the three months ended September 30, 2024 and 2023 are set out below.

| | 2024 | 2023 |
|---|----------------|------------------|
| | \$ | \$ |
| EXPENSES | | |
| Exploration expense | 358,991 | 941,427 |
| General and administrative expense | 568,012 | 371,358 |
| Finance income, net | (604) | (6,587) |
| Equity loss impact of equity accounted investment | 21,345 | 19,785 |
| Loss and comprehensive loss | 947,744 | 1,325,983 |

Three months ended September 30, 2024:

- **Exploration expenses** decreased from \$941,427 to \$358,991. The current period results are not directly comparable to 2023, as the 2023 results reflect the regional exploration program undertaken to inform the rationalization of the Hope Brook land package. The current period expense consisted primarily of environmental baseline studies and a fieldwork program focused on follow-up prospecting and sampling in areas identified as high priority targets.
- **General and administrative expenses** increased from \$371,358 to \$568,012. The most significant components of this increase are set out below.
 - **Share based compensation expense** increased from \$53,720 to \$330,699. The expense for each period reflects a combination of:
 - Stock option expense, which decreased from \$94,183 to \$29,674 and reflected a decrease in the number of unvested options during the period.
 - Expenses related to the Company's cash- and equity-based DSU plans and its RSU plan, which decreased from an aggregate negative expense of \$40,463 to

an aggregate expense of \$301,025. The expense recognized in the current period with respect to these plans reflects both the recognition over the vesting periods of DSUs and RSUs to its directors and officers in prior periods and mark to market adjustments in the value of liabilities with respect to each plan, in line with movements in the price of the Company's common shares from one reporting period to another.

- **Investor relations** decreased from \$38,888 to \$15,201, reflecting reduced levels of promotional activity made necessary by the state of the Company's treasury during the majority of the period.
- **Professional fees** decreased from \$38,888 to \$15,201, reflecting the non-recurrence of legal and other professional fees related to the Company's acquisition of Gold Island.

PROPOSED TRANSACTION

On September 24, 2024, the Company announced that it had entered into a non-binding letter of intent ("LOI") with Caprock covering the optioning of a 100% interest in the Company's Destiny project.

Under the terms of the LOI, and subject to the negotiation of a definitive agreement, Caprock would have the right to obtain a 100% interest in Destiny by making the following exploration expenditures and payments to the Company:

- Issue 8,000,000 common shares on the closing date;
- Pay \$100,000 in cash and issue \$250,000 in shares on or before the first anniversary of the option agreement;
- Pay \$250,000 in cash and issue \$350,000 in shares on or before the second anniversary;
- Pay \$400,000 in cash and issue \$700,000 in shares on or before the third anniversary;
- Incur aggregate exploration expenditures of \$2,450,000 over the term of the option agreement

In the event that Caprock earned 100% of Destiny, the Company would retain a 1% Nest Smelter Return royalty, which could be bought back at a price of \$1,000,000.

An exclusivity period stipulated in the LOI has expired, and at the date of this MD&A, no definitive agreement had been reached. There can be no assurance that a definitive agreement will be concluded with respect to this proposed transaction.

SELECTED ANNUAL INFORMATION

The following table summarizes selected financial data for the Company for each of the three most recently completed financial years. The information set out below should be read in conjunction with the Company's audited annual consolidated financial statements.

| | Years ended June 30 | | |
|---|---------------------|------------------|-------------------|
| | 2024 | 2023 | 2022 |
| | \$ | \$ | \$ |
| EXPENSES | | | |
| Exploration expense | 2,209,861 | 2,626,159 | 9,674,573 |
| General and administrative expense | 1,294,836 | 876,513 | 1,788,792 |
| Finance (income) expense, net | (21,301) | (110,902) | 414,206 |
| Other income | - | (11,000) | (496,459) |
| Impairment loss on equity accounted investment | - | 140,877 | 390,128 |
| Writedown of exploration and evaluation assets | 1,223,578 | - | 843,520 |
| Equity loss impact of equity accounted investment | 99,162 | 159,123 | 109,872 |
| Loss for the year | 4,806,136 | 3,680,770 | 12,724,632 |

SUMMARY OF QUARTERLY RESULTS

The table below presents selected financial data for the Company's eight most recently completed quarters:

| | 30-Sep 2024 | 30-Jun 2024 | 31-Mar 2024 | 31-Dec 2023 | 30-Sep 2023 | 30-Jun 2023 | 31-Mar 2023 | 31-Dec 2022 |
|---|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|
| <i>In thousands of Canadian dollars, except for (income) loss per share</i> | | | | | | | | |
| Financial results | | | | | | | | |
| Loss for the period | 948 | 1,654 | 454 | 1,372 | 1,326 | 490 | 522 | 565 |
| Basic and diluted (income) loss per share | - | 0.03 | - | 0.01 | 0.01 | - | - | - |
| Exploration and evaluation expenditures | 359 | 258 | 33 | 977 | 941 | 121 | 343 | 210 |
| Balance sheet data | | | | | | | | |

LIQUIDITY AND CAPITAL RESOURCES

The Company has no cash flow from operations as its projects are at an exploration stage, and consequently financings and the proceeds from selling or optioning non-core mineral property interests have been the Company's primary sources of funds. Management regularly reviews expenditures and exploration programs and equity markets in order that the Company has sufficient liquidity to support its operations.

At September 30, 2024, the Company had cash, receivables and marketable securities of \$1,257,319 and current liabilities of \$304,223.

During the period ended September 30, 2024, the Company funded its operations with existing cash resources and the proceeds of a private placement of 30,000,000 common shares, which closed on September 18, 2024, generating aggregate gross proceeds of \$1,500,000.

The Company will require further cash infusions, either through additional equity financings, proceeds obtained from the sale or optioning of non-core assets, or other means as it moves toward execution of its exploration plans with respect to the HBGP. There is no assurance that the Company will be successful in this regard.

RELATED PARTY TRANSACTIONS

During the three-month periods ended September 30, 2024 and 2023, the Company incurred the following costs in respect of services provided by related parties:

| | 2024 | 2023 |
|---|----------------|----------------|
| | \$ | \$ |
| Charged to Salaries, Wages and benefits: | | |
| Salaries paid to key management | 96,800 | 80,000 |
| Director fees | 28,000 | 33,500 |
| | 124,800 | 113,500 |
| Charged to Share-Based Compensation: | | |
| Stock option expense | 29,674 | 94,183 |
| Equity-based DSU expense | 200,452 | 12,960 |
| Cash-based DSU expense | 70,107 | (52,291) |
| RSU expense | 30,466 | (1,132) |
| | 330,699 | 53,720 |
| Management fees charged to Exploration Expense: | | |
| OTD Exploration Inc. (controlled by the Company's Vice President Exploration) | 9,350 | 46,963 |
| | 9,350 | 46,963 |

FULLY DILUTED SHARE CAPITAL

The table below presents the Company's fully-diluted common share data as at the date of this MD&A.

| | |
|---|--------------------|
| Common shares | 229,637,578 |
| Shares issuable upon exercise of outstanding warrants | 1,029,744 |
| Shares issuable upon exercise of outstanding options, of which 7,696,182 are exercisable | 10,788,348 |
| Shares issuable upon settlement of equity-based deferred share units, all of which are vested | 1,335,470 |
| Shares issuable upon settlement of restricted share units, none of which are vested | 726,923 |
| Total - fully diluted | 243,518,063 |

OFF-BALANCE SHEET ARRANGEMENTS

The Company has no off-balance sheet arrangements, either at September 30, 2024 or subsequently to the date of this MD&A.

CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of the consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported expenses during the period. Actual results could differ from these estimates.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- The assessment by management of the reasonableness of the going concern assumption.
- The decision by the Company to treat the acquisition of Gold Island Inc. as an asset acquisition.
- The carrying value and the recoverability of exploration and evaluation assets, which are included in the consolidated statements of financial position based on the planned exploration budgets and drill results of exploration programs to assess economic recoverability and probability of future economic benefits.
- The assessment by management of the recoverability of the Company's investment in Caprock.
- The inputs used in accounting for share-based compensation expense included in profit or loss, which are calculated using the Black-Scholes option pricing model.
- The valuation of shares issued in non-cash transactions.
- The recognition of deferred tax assets based on the change in unrecognized deductible temporary tax differences.

DISCLOSURE FOR VENTURE ISSUERS WITHOUT SIGNIFICANT REVENUE

Additional disclosure concerning the Company's general and administrative expenses and mineral property acquisition and exploration costs is provided in the Company's condensed interim consolidated financial statements for the three months ended September 30, 2024. These financial statements are available on the Company's website at www.bigridgegold.com or on SEDAR+ at www.sedarplus.com.

DIVIDENDS

Big Ridge did not pay a dividend in the period ended September 30, 2024 and has no plans to pay dividends for the foreseeable future.

LEGAL PROCEEDINGS

At September 30, 2024 and subsequently to the date of this MD&A, there were no material legal proceedings involving the Company.

DISCLOSURES ABOUT RISKS

Big Ridge is subject to the usual risks associated with a junior mineral exploration company. The Company competes for access to financing, specialized third-party service providers and human capital against other exploration companies, some of whom may be better capitalized. The price of gold, the principal metal contained within Big Ridge's mineral exploration properties, has fluctuated significantly over the past few years and may continue to do so. Such volatility may affect the timing and magnitude of funds which the Company may seek to raise to support further exploration of its properties or may make it difficult or impossible for the Company to complete an offering of securities.

Resource acquisition, exploration, development, and mining is a highly speculative business that involves significant risks, which even a combination of careful evaluation, experience and knowledge may not eliminate. While the discovery of precious metals and other minerals may result in substantial rewards, few properties that are explored are ultimately developed into producing mines. Major expenses may be required to locate and establish economically viable mineral deposits, to develop metallurgical processes and to construct mining and processing facilities at a particular site. It is impossible to ensure that the acquisition, exploration or development programs planned by the Company will result in a profitable commercial mining operation. The potential for any project to eventually become an economically viable operation depends on numerous factors including: the

quantity and quality of the minerals discovered if any, the proximity to infrastructure, metal and mineral prices (which vary considerably over time) and government regulations. The exact effect these factors can have on any given exploration property cannot be predicted accurately, but the effect can be materially adverse.

Although management has used its best efforts to ensure title to properties in which it has interests, there is no guarantee that title to the properties will not be challenged or impugned. The Company's mineral property interests may be subject to prior unregistered agreements or transfers or land claims, and title may be affected by undetected defects.

In addition to the foregoing, Big Ridge is subject to a number of other risks and uncertainties which are not discussed in this MD&A. To properly understand such risks, readers are directed to the risk factors disclosed under the heading "Risk Factors" in Big Ridge's Annual Information Form for the year ended June 30, 2024 and other filings made with Canadian securities regulatory authorities, available on SEDAR+ at www.sedarplus.com.
