

## NEWS RELEASE

### **BIG RIDGE GOLD CORP COMMENCES 2026 WORK PROGRAM AT HOPE BROOK GOLD PROJECT**

**Toronto, Ontario, April 28, 2026**, Big Ridge Gold Corp. (TSXV: BRAU, OTCQB: ALVLF) (“**Big Ridge**” or the “**Company**”) is pleased to announce that the company has mobilized its team for the 2026 work program at the Hope Brook Gold Project (“HBGP”), located on the southwest coast of Newfoundland & Labrador.

#### **2026 Work Program**

- Commence Geotechnical and Hydrogeological drill program.
- Infill and expansion drilling at the 240 Zone and Main Zone.
- Finalize metallurgical test work and produce concentrate samples for potential offtake partners.
- Complete Hope Brook Gold Project Preliminary Economic Assessment (PEA).

Michael Bandrowski, President and CEO of the Company, commented: “2026 will be a significant year for Big Ridge as we continue advancing the HBGP. With the camp now open we look forward to getting back to work, advancing the HBGP toward production and expanding gold and copper mineralization. We anticipate mobilizing the first drill rig in early June to focus on geotechnical and hydrogeological drilling before moving to infill and exploration drilling. The geotechnical and hydrogeological drilling is the priority for the company as the PEA nears completion and we move toward more detailed engineering.”

#### **Natural Resource Stock Expo 2026**

Big Ridge Gold Corp. will be attending the Natural Resource Stocks Expo May 1-2 in Atlanta Georgia.

## **Qualified Person**

Paul Robinson, P. Geo., Vice President Exploration for Big Ridge, a Qualified Person within the meaning of NI 43-101, *Standards of Disclosure for Mineral Projects*, has reviewed and approved the technical information contained in this news release.

## **About Hope Brook**

The Hope Brook Gold Project is an advanced stage, high-grade gold project that produced 752,162 ounces of gold from 1987 – 1997. Initial production consisted of an open pit before moving to underground mining. Hope Brook operated using both heap leach (1987 -1990) and conventional cyanidation milling methods (1989-1997) with a later inclusion of flotation concentration to recover copper (1991). Government records indicate that gold recoveries from milling ranged between a low of 78.8% in 1987 and a high of 85.9% in 1989. Government and company annual reports indicate that gold recoveries ranged between a low of 82.1% in 1994 and a high of 89.83% in 1996 following a change of ownership. Copper flotation produced a concentrate at approximately 22% Cu and 34.3 g/t Au for shipment in 1992.

Hope Brook hosts an Indicated gold resource totalling 16,190,000 tonnes grading 2.32 grams per tonne gold for 1.2 million ounces and Inferred resources totalling 2,215,000 tonnes grading 3.25 grams per tonne gold for 231,000 ounces based on a 0.4 and 2.0 gram per tonne cut-off grades for open pit and underground resources respectively using a long-term gold price of US\$1,750.

The Hope Brook gold deposit is a high-sulfidation epithermal gold deposit hosted in the Proterozoic aged Whittle Hill Sandstone and is intruded by a Late Proterozoic quartz-feldspar porphyry sill-dike complex of the Roti Intrusive Suite. The deposit is located adjacent to and within an extensive advanced argillic alteration envelope which includes pyrophyllite, kaolinite, andalusite, and alunite. The principal gold mineralization occurs in a buff-colored massive, vuggy silicic alteration with an associated, less developed grey silicic alteration with pyrite, chalcopyrite and lesser bornite accessory minerals. Gold mineralization is also found with pyrite in units of advanced argillic alteration adjacent to or near silicic alteration horizons. The altered and mineralized zone is cut by mafic dykes whose contacts are often mineralized. All the altered and mineralized sequences and the intruded dykes have been folded.

Hope Brook is located 85 kilometers east of Port aux Basques, Newfoundland. The project has well maintained infrastructure on site, including an operational 28-person camp, an 1,100-meter airstrip, ice-free docking facility and importantly, connection to the provincial electrical power grid via an on-site substation.

## **About Big Ridge Gold Corp.**

Big Ridge Gold Corp. is an exploration and development company managed by a disciplined and experienced team of officers and directors. The Company is committed to the development of advanced stage mining projects using industry best practices combined with strong social license from our local communities. Big Ridge owns an 100% interest in its flagship Hope Brook Gold Project, located in Newfoundland and Labrador. Big Ridge also owns 100% in the highly prospective Oxford Gold Project located in Manitoba and the Destiny Gold Project in Quebec.

## Acknowledgement

Big Ridge acknowledges and appreciates the Newfoundland and Labrador Ministry of Natural Resources' financial support of the Company's 2023 exploration programs through the Junior Exploration Assistance (JEA) Program.
